Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 44, 52-53, 56-57, 59, 65, 69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gould et al (US006382845B1).

Gould's device discloses a fiber optic tube assembly, comprising: a tube or a housing (52, 54), wherein the at least optical fiber (20 or 22) is disposed with the tube; and least one material, the at least one strip of material or a plate portion (56) acting as frictional agent or retainer to increase the force required for pulling the at least optical fiber out of the tube. However, Gould's device fails to disclose the shore A hardness, the degree of melting point, the tensile modulus or in another word the material type of which the strip is made of. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use certain material type, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use certain material type in order to meet the system design and requirement in Gould's device.

Conclusion

Allowable Subject Matter

2. Claims 45-5~~4~~, 54-55, 58, 66-68 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to disclose the combination features the optical tube with the strip with thermoplastic molecules that have bonded to form a three dimensional network substantially throughout; the strip material being continuous along the length of the tube with the rest of the claims limitations.

3. Claims 60-64 are allowed (see the aforementioned allowable subject matter).
